Do you support the following recommendation: To maintain the current procedure of posting the total final judges' score for each run on the video presentation, but to include a QR code on the drag breaks that allows members and fans to get direct and quick access to the individual judges' scores. Additionally, to provide information of where to access both the digital and physical score sheets should a member want to view maneuver evaluation and penalty application. This recommendation was further asked to be put forward for all NRHA major events to allow for uniformity in the sport.
